

ELKHORN RURAL PUBLIC POWER DISTRICT

POLICY #3190

IRRIGATION POLICY

The Manager shall determine the number of new electric irrigation installations and specific locations for new electric irrigation wells to be connected each year based on the following criteria and any other pertinent information:

- (1) Customers who have requested service and are on a waiting list will be connected in the order of request, when feasible, and offered service at any of the available control rates.
- (2) Available capacity of the system in the specific area.
- (3) Amount of construction required and ability of District to complete the installation in a timely manner (materials, labor, etc.).

This policy shall rescind any previous policy in conflict.
